EE/CprE/SE 491 WEEKLY REPORT 8

4/8/2019 – 4/12/2019

Group number: sddec19-09

Project title: Finding Hay in the Needle Stack

Client &/Advisor: Andy Zobro & Srikanta Tirthapura

Team Members/Role: Yealim Sung/ Project Leader & Meeting Scribe

Gooi Yin Hong/ Webmaster & Lead Designer

Austin Konsor/ Chief Engineer & Software Architect

Mireille Mwiza Iradukunda/ Test Engineer & Report Manager

Weekly Summary

This week, we did not have our weekly meeting with Kirsten and Branden on Zoom on Tuesday, as a team we decided that there was not adequate amounts of questions for the client therefore we decided to keep working on our individual tasks. Austin was able to get access for Branden and Kirsten to our team GitLab from the ETG. From now on they will be able to access our repository anytime.

Past Week Accomplishments

Yealim Sung: I signed up for the final presentation and looked through our documents. Created the project plan so that we could get started with it.

Gooi Yin Hong: Handed in the missing NDA form. Looking through the sample test that Branden emailed

Austin Konsor: I was able to gain our client's access to our GIT repository through the ETG. I also was looking through Branden's practice data.

Mireille Mwiza Iradukunda: The past week, I looked at the test files that Branden sent some more and wrote a script to go through the file. I wrote the report.

Pending Issues

As a team:

- We are still gathering information for the project before getting started.
- Get access to data and attributes

Individual Roles, Contribution and Time Spent

Name	Role	Contribution	Hours Worked	Hours Cumulative
Yealim Sung	**Project Leader /Meeting Scribe**	.Created final project proposal and looked through the documents once more.	**4**	**37**

	and Report Manager	files		

Plans for the Upcoming Reporting Period:

As A team:

- Learn more about APIs that will be used in this project.
- Work on the project plan
- Plan for the presentation

Individually

Yealim Sung: Will start preparing for the presentation and revise our plan with the clients before the semester is over.

Gooi Yin Hong: Probably be wrapping up what is left to do for our project proposal and preparation for presentation.

Austin Konsor: Start working on presentation and finishing our final project plan.

Mireille Mwiza Iradukunda: I will be working on our final project plan which is due next week. I will also work on our presentation material.
